

2023-2024 Key Trends and Updates: Securities Litigation Against Life Sciences Companies Webinar

In this webinar, [Caroline Bullerjahn](#), [Tucker DeVoe](#), and [Justin Ward](#) from Goodwin, and [Frank Schneider](#) from Cornerstone Research will discuss key updates and recent trends concerning securities class actions filed against publicly traded pharmaceutical, biotechnology, medical device and healthcare product and services companies (collectively, “life sciences companies”), which continue to be a primary target of the plaintiffs’ bar. While securities class action litigation against life sciences companies decreased slightly in 2023 compared to 2022, life sciences companies remain by far the most targeted sector for these suits, and the total number of securities class action suits filed against life sciences companies remains above the long-run historical average (40 filings in 2023 compared to 37 filings per year in from 1997-2022).

In addition to analyzing these overall trends, we will:

- examine data for class action filings in 2023 and trends based upon such data, focusing on filings against life sciences companies;
- review several significant, impactful recent decisions issued by federal courts particularly relevant to life sciences companies;
- provide in-depth analysis of the potential implications of these decisions, which involve challenges that life sciences companies often face; and
- discuss practical steps you can take to make informed choices related to your business, including your public disclosures.

This program is pending one hour CLE credit in California, New York, New Jersey, and/or Pennsylvania.

This webinar is scheduled for Wednesday, April 3rd from 2:30 – 3:30 PM ET. Please [register](#) here.

Webinar: 2022-2023 Key Trends and Updates: Securities Litigation Against Life Sciences Companies

Publicly traded life sciences companies continue to be the primary target of the plaintiffs' bar, facing far more securities class action lawsuits compared to other sectors. What does this mean for your business, and what practical steps can you take to make informed choices? Join [Caroline Bullerjahn](#), [Courtney Orazio](#), and [John Barker](#) as they speak to these pressing issues in Goodwin's webinar, "2022-2023 Key Trends and Updates: Securities Litigation Against Life Sciences Companies," taking place on Thursday, June 8th from 2:30 - 3:30 PM ET.

[2020 Year in Review: Securities Litigation Against Life Sciences and Healthcare Companies](#)

Despite the turmoil and disruption of 2020, plaintiffs' lawyers and courts appear to have adapted readily to our "new normal." Although at lower rates than previous years, plaintiffs' firms continued to file securities class actions against publicly traded pharmaceutical, biotechnology, medical device and healthcare product and services companies in 2020, while courts continued to issue detailed, substantive decisions in these actions. The number of class action filings in state and federal courts from last year shows a 22% decline from a record level in 2019 - a decrease for the first time since 2016, but still far higher than the 1997-2019 average.

In Goodwin's fifth annual Year in Review publication, we focus on active jurisdictions that are geographic epicenters for life sciences and healthcare companies: the First Circuit and the District of Massachusetts; the Second Circuit and New York District Courts; and the Ninth Circuit and California District Courts. In our analysis, we summarize key decisions issued in these jurisdictions during 2020 in class actions against life sciences and healthcare companies, as well as cases to watch in 2021.
